Lily Pools, Rock Gardens and Hardy Perennials

are not difficult. The pool and the rockery add an indefinable charm to the garden; and are not necessarily expensive. The two form a combination of bewitching beauty. If space is limited a Water Lily may be grown in a tub. This book tells how to make and what to grow in them.

Hardy Perennials are the backbone of the garden; once planted they grow every year without further planting. They include Peonies, Iris, Lilies, Chrysanthemums, Delphiniums, Phlox, Daisies, etc. This book lists and describes nearly 300 hardy perennials and more than 250 flowers that are annual or biennial. Also gives correct pronunciations of practically every flower grown.

It contains special articles on Peonies, Iris, Lilies, Gladiolus, Gladiolus Bulblets and Shrubs. Tells how to prepare the soil, fertilize, plant, cultivate, mulch, water, hybridize and how to harvest and store bulbs.

Flowers for the Beginner is a helpful chapter in which is listed and described those plants easiest grown from seed and which make good cut flowers.

"How to Grow Fine Flowers" is a 200-page book, beautifully bound in cloth, and written by E. H. and R. T. Wilson who have had more than thirty years experience as growers of fine flowers. The book will save many times its price; also makes a fine and useful present for a flower loving friend. Price postpaid, \$2.50.

CULTURE

Glads may be planted from May 1st to July 1st. They love the sunshine. Do not plant in shaded places, nor near foundation wall.

Ground that will grow smooth potatoes is suitable. Thoroughly work in pulverized sheep manure, wood ashes, well rotted manure, bone meal, or a good potato fertilizer. Never allow fresh manure to come in contact with the bulbs.

Plant three inches deep, four or five inches apart in rows. Add soil gradually until they are covered about six inches. Cultivate frequently. Keep free from weeds. Do not allow the ground to become hard or crusted over.

If necessary to water, do so thoroughly.

Cut the stalk in the morning when first bud opens and place in cold water in a vase in the house. Change the water each morning, remove all wilted blossoms, and slice slantingly about one-half inch from the bottom of stalk each day. Make sure to leave at least four leaves when cutting, to mature the bulbs.

Dig when the leaves turn brown, cut tops off close to bulb and store in light, airy place until dried. Remove all old corms and roots, and store in a light, cool, frost-proof cellar in receptacles not over four inches in depth.
